

Solution for Sore, Aching Feet!

Fabrics radiate Far Infrared Rays:

PROLOTEX™ therapy Socks emit the Far Infrared Rays (FIR) deep into the cells & tissues of your feet and ankles increasing micro circulation and promoting cell rejuvenation.

The **PROLOTEX™** bio-ceramic impregnated thread used to make the socks is safe allowing you to wear on a regular basis. Research shows these unique natural compounds are very effective in relieving soreness, swelling, aches, sprains, or other soft tissue injuries

FIR Socks reduce the stress & strain on your precious ankles and toes. Adults, kids, grandparents and even teenagers have all noticed receiving **Positive Results** almost immediately while wearing the socks. **PROLOTEX™** FIR Socks are **very affordable** when compared to the cost of pharmaceutical drugs and massage therapies.

PROLOTEX™ and

Health:

PROLOTEX™ Far Infrared Therapy products have been shown to penetrate through the skin layers, deep into the tissues. By stimulating micro vibrations initiate a thermal reaction to elevate tissue temperature. The body reacts to this by dilating micro vessels and major blood vessels to improve micro and macrocirculation, revitalizing tissues and promoting healing and regeneration. In addition, the thermal action helps to keep the wearer comfortably warm in cold temperatures.

PROLOTEX™ FIR Socks can be used to relieve pain and swelling associated with the following ailments:

- Arthritic Toes
- Athlete's Foot
- Blue Toes
- Bunions
- Bursitis
- Cold Feet
- Charcot Foot
- Fractures
- Heel Fissures
- Plantar Fasciitis
- Psoriasis
- Raynaud's Feet
- Sore Feet
- Sprained Ankle
- Strains
- Tarsal Tunnel Pain

PROLOTEX™ products have shown positive results for:

- Improving Circulatory
- Increase muscle strength
- Increased energy
- Cell regeneration

Releasing toxins stored in the tissues

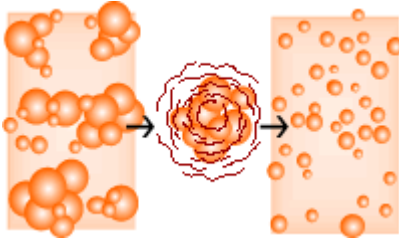

Diagram shows how Far Infrared Rays resonates to break apart dormant sticky cells into smaller water encased molecules. Smaller toxic particles can now be easily flushed out through the lymph and circulatory systems.

By stimulating the metabolic functioning of your foot tissue at the cellular level, "nasty" toxins are flushed from the muscles. Such things as poisons, carcinogenic heavy metals, toxic substances, lactic acid, free fatty acids, uric acids associated with exercise, aging and fatigue.

By using PROLOTEX™ Far Infrared therapy products, you can shorten recovery time and preventing injuries.

"I just have to let you know what a difference your socks made. One evening I was a bit exuberant in doing some stretching and woke up the next morning with severe pains in the front of my ankles and down my shins. I could hardly walk down the stairs to get my new socks. I put them on and within about 20 - 30 min. was able to get around the house. The severe pain was reduced to a bearable ache and I was able to get through the day. I took them off in the evening and almost immediately the pain in the front of my ankles increased again. I can't tell you how your socks helped me. My only thing now is to have you guys make a longer sock that will cover my shins... up to the knee maybe like knee socks.

Thanks again for a great product."
S. Neuman

Far Infrared Therapy Socks can be used successfully for the outdoor sports enthusiast.

Washing Instructions:

- Hand wash or gentle cycle in cold water (below 15°C or 60°F).
- Detergent or mild soap can be used.
